Stanford Technology Partners Inc.

'Partners in success with a passion to excel'

Our expertise in Cerner

STPI has proven abilities and expertise in providing strong resources with clinical background and subject matter expertise in various Cerner modules.

Our resources help streamline existing workflows, operations and technology. We work with various departments in the provider organization to facilitate a seamless migration of their services to future state while ensuring clinical continuity in the current system.

Stanford team creates collaborative partnerships with various stakeholders of the system to optimize and attain required productivity levels during critical transition periods.

STPI will partner in identifying and realizing your goals with simple achievable process re-engineering.
